

Studying Sustainable Development prepares me to . . .

Understand ecological, economic, political, humanistic, energy, and natural resource challenges to sustainable development

Debate and enact technological strategies for mitigating adverse effects on the environment

Analyze quantitative data

Handle complex, real-world problems in the field, community, and workplace

Strategically manage projects and creatively adapt to reach goals

Critically analyze problems around water, energy, climate, food, and health, from a scientific and social scientific perspective

Clearly communicate analyses and interpretations

Collaborate on diverse teams

Carefully document and cite sources

Analyze complex interactions between the planet's natural and social systems to address sustainability challenges
