My Columbia Physics degree prepares me to...

- Demonstrate knowledge and understanding of the physical laws of nature
- Demonstrate skills in the design, execution, analysis, and interpretation of laboratory experiments
- Analyze, evaluate, and interpret quantitative data
- Organize and visualize experimental results
- Apply mathematical and modeling skills
- Clearly communicate scientific concepts and results orally and in writing, to different audiences
- Work methodically and accurately, individually or in a team
- Interpret and critique scientific and technical texts, presentations, and primary literature
- Approach issues in physics from a multidisciplinary perspective
