Hi from Kelly on the Graduate Student Career Development team! Join us today, Jan. 24 and over the next few weeks for our interactive Effective Job Search Strategies for Graduate Students Workshop. In a quick, concise 30-minute format, you will learn the most effective ways to launch a successful job search in the spring semester.

Hello from Kate in Employer and Alumni Relations! This week Kelly, Don, and I spoke with Citadel regarding their upcoming PhD recruitment for quantitative traders, developers, and researchers. The company currently has 275 PhDs on staff and are looking to increase this number. They are especially interested in students that can bring in an analytical approach such as those with backgrounds in math, physics, applied science, industrial engineering, and computer science. Citadel will be hiring for both full time and internship opportunities and are open to sponsorship. Be on the lookout for their spring information session coming soon!

Interviewing is the most personal part of the job search process because it involves seeing if a candidate will mesh well with company culture. This “fit” can be measured by evaluating a candidate’s interpersonal skills, enthusiasm, and general presentation. With research, proper preparation, and appropriate attire, you can demonstrate you are the right candidate for the position. Check out the Interviewing Section of our Career Planning Guide for more!

You've applied. Now it's time to prepare.
