Your major can definitely demonstrate relevant coursework and knowledge to a prospective employer, but your studies aren’t the only aspect of your experience that employers are evaluating. They select people who they believe can do the job (have the right skills), want the job (have demonstrated an interest in the field) and are a personality fit for the team and organization.

### What value do East Asian Languages and Cultures majors bring?

According to the East Asian Languages and Cultures department at Columbia, the East Asian Languages and Cultures curriculum helps you to develop the following skills:

• Language expertise
• Multicultural awareness
• Analytical skills
• Ability to think critically and creatively
• Research skills
• Verbal and written communication skills
• Collaboration and teamwork skills

### What if I’m an international student?

For international students at Columbia under student visas, selecting your major can play a significant role if you plan to work in the US after completion of your degree. Optional Practical Training is a work authorization that allows an international student to work in a job *directly related* to the student’s major area of study either before or after degree completion. Employer sponsored H1B Visas also have similar strict requirements. Students with more questions about this should visit the International Student & Scholars Office (ISSO) and view CCE’s International Students webpage at [careereducation.columbia.edu/students/International-Students](http://careereducation.columbia.edu/students/International-Students).
