Your major can definitely demonstrate relevant coursework and knowledge to a prospective employer, but your studies aren’t the only aspect of your experience that employers are evaluating. They select people who they believe can do the job (have the right skills), want the job (have demonstrated an interest in the field) and are a personality fit for the team and organization.

What value do Economics majors bring?

According to the Economics Department at Columbia, the economics curriculum helps you to develop the following skills:

• Critical thinking and quantitative analysis
• Ability to gather and analyze data related to social, economic, and business problems
• Ability to write clear, concise technical reports and essays
• Ability to communicate the results of analysis
• Ability to understand how incentives and skills influence the behavior of individuals, business firms, and other organizations

What if I’m an international student?

For international students at Columbia under student visas, selecting your major can play a significant role if you plan to work in the US after completion of your degree. Optional Practical Training is a work authorization that allows an international student to work in a job directly related to the student’s major area of study either before or after degree completion. Employer sponsored H1B Visas also have similar strict requirements. Students with more questions about this should visit the International Student & Scholars Office (ISSO) and view CCE’s International Students webpage at careereducation.columbia.edu/students/International-Students.
