Your major can definitely demonstrate relevant coursework and knowledge to a prospective employer, but your studies aren’t the only aspect of your experience that employers are evaluating. They select people who they believe can do the job (have the right skills), want the job (have demonstrated an interest in the field) and are a personality fit for the team and organization.

What value do Music majors bring?

The Music curriculum helps you to develop the following skills:

- Think/read conceptually and critically
- Have an understanding of various types of musical performance, improvisation, composition, and written and oral reflection about music
- Have a vocabulary of specific pieces or repertories of music, a knowledge of the traditions from which they derive, and the ability to form analytical statements about them
- Conduct research in libraries, archives, private collections, and online
- Differentiate between serious and trivial sources of information
- Cite sources with ethical appropriateness
- Write cogently and coherently

What if I’m an international student?

For international students at Columbia under student visas, selecting your major can play a significant role if you plan to work in the US after completion of your degree. Optional Practical Training is a work authorization that allows an international student to work in a job directly related to the student’s major area of study either before or after degree completion. Employer sponsored H1B Visas also have similar strict requirements. Students with more questions about this should visit the International Student & Scholars Office (ISSO) and view CCE’s International Students webpage at careereducation.columbia.edu/students/International-Students.
