  In the City of New York

My Columbia Industrial Engineering & Operations Research degree prepares me to...

- Apply knowledge of mathematics, science, and engineering
- Design and conduct experiments, as well as analyze and interpret data
- Assess practical situations and problems, formulate models of the problems represented, design potential solutions, and evaluate their impact
- Design a system, component, or process to meet desired needs within realistic constraints
- Function on multidisciplinary teams
- Communicate solutions and recommendations effectively through written, oral, and electronic presentations
- Understand ethical issues and professional and managerial responsibilities
- Identify, formulate, and solve engineering problems
