Majoring in... Biomedical Engineering?

Where did last year's grads go?

90% Employed
62% Grad School, Fellowship
28% Taking Time Off, Still Searching
10%

Concrete Plans
(Employed, Grad School, Fellowship)

*Data from the 2016 Graduating Student Survey: 59% response rate*

What are alumni doing?

**EMPLOYMENT**

- Remedy Partners
- Smith & Nephew
- National Institutes of Health
- Regeneron
- Columbia University
- MGH General Hospital
- Innoligo Biomedical
- Bain & Company
- Goldman Sachs
- General Motors
- IBM
- Singer Deutsch LLP
- Hypothetiks
- Northwestern University

**GRAD SCHOOL**

- Columbia University
- UW Medicine School of Medicine
- Northwestern University
- Icahn School of Medicine at Mount Sinai
- Stanford University
- Florida International University

As a Columbia Biomedical Engineering major, I can...

- Understand biology and physiology, and apply advanced mathematics, science, and engineering to solve problems at the interface of engineering and biology.
- Make measurements on and interpret data from living systems.
- Address the problems associated with the interaction between living and non-living materials and systems.
- Design and conduct experiments as well as analyze and interpret data.
- Coordinate the activities of and function on multidisciplinary teams.
- Communicate effectively.
- Understand the impact of engineering solutions in a global and societal context.
