- **27%** Still Searching, Taking Time Off
- **14%** Concrete Plans (Employed, Grad School, Fellowship)

*Data from the 2016 Graduating Student Survey: 55% response rate

As a Columbia Chemical Engineering major, I can...

- Quickly learn and adapt to advances in technology
- Demonstrate an understanding of professional and ethical responsibility
- Function as a member of a multi-disciplinary team
- Design a system, component, structure, or process to meet desired needs
- Analyze and interpret data
- Identify, formulate, and solve engineering problems using modern tools, techniques, and skills
- Adapt processes to function within economic, environmental, political, ethical, health and safety, manufacturing, and sustainability constraints
- Communicate effectively
