My Columbia Biochemistry degree prepares me to...

- Approach biochemical issues from a multidisciplinary perspective
- Perceive patterns and structures to formulate hypotheses
- Design and test hypotheses using scientific theory, research methods, and experimental design
- Analyze, evaluate, and interpret data
- Interpret and critique scientific texts, presentations, and primary literature
- Clearly communicate complex scientific results and concepts orally and in writing
- Organize and visualize experimental results
- Collaborate on team projects
- Implement safe and ethical research practices
