My Columbia E3B degree prepares me to...

- Evaluate biological issues from an interdisciplinary perspective
- Design and execute an independent scientific research project
- Access and assess scientific literature
- Develop hypotheses and research questions
- Present research goals, methods, and results orally and in writing
- Understand the ethical issues involved in research
- Develop critical thinking, evaluation, and synthetic skills including the ability to locate, integrate, and evaluate information from multiple sources
- Analyze data to interpret experimental results
