As a Columbia Earth & Environmental Engineering major, I can...

Design and conduct experiments

Analyze and interpret data

Function effectively on a multidisciplinary team

Identify, formulate and solve engineering problems

Understand the impact of engineering solutions in a global, economic, environmental, and societal context

Design a system, component, or process to meet desired needs within economic, environmental, social, political, ethical, health, and safety, manufacturability, and sustainability restraints

Communicate effectively

Provide leadership and innovation in the use of natural resources
