

Psychology | BEYOND COLUMBIA

Studying Psychology prepares me to . . .

Design experiments and conduct research to test hypotheses

Interpret measurements using statistical analyses

Evaluate, organize, and visualize quantitative data

Analyze and evaluate arguments, findings, and claims about psychological phenomena

Approach problems scientifically

Act ethically in the science and practice of psychology

Apply psychological concepts, theories, and research findings to real-world problems

Clearly communicate theories, hypotheses, methods, and findings orally and in writing

Understand the complex interconnected relationship between the brain, behavior, and experience

Carefully document and cite sources
